

Infant/Toddler Program

Typically ages

6 weeks to 15 months

A new expression. First teeth. Newfound mobility. Because these milestones occur at different times for different children, our teachers work one-on-one throughout the day with each Minnow. A typical day features boatloads of fun and stimulation, including storytime, sensory play and language repetition.

"After visiting several places, we liked the loving environment of Tots' Landing, where teachers hugged the children and talked with the babies."

- Parent

Every day means something new in a Minnow's life – and at Tots' Landing, we celebrate those personal achievements, large and small. That's all part of a philosophy designed to maximize the development and happiness of children ages six weeks to five years. Since our founding in 1993, we have grown to provide a safe, fun and comfortable environment for children to play, laugh and learn in five Middle Tennessee locations.
